GO TECHNOLOGIES

# Website Content Revised Draft

## Everything begins with Go.

A consolidated corporate website content specification, revised from Tourithm's working draft. This version tightens the homepage narrative, clarifies conversion paths, separates corporate and GoChauffeur responsibilities, and adds legal-page and implementation requirements.

| | |
|---|---|
| **STATUS** | Client review - not final legal copy |
| **VERSION** | Revised Draft v2 - 13 September 2026 |
| **SOURCE** | Go Technologies Website Content - Working Draft, prepared by Tourithm |

## Built in Sri Lanka. Designed for the world.

00 / REVISION SUMMARY

# What changed

The original strategic direction remains intact. The revision removes duplicated ideas, reduces competing calls to action, and converts the document into a clearer implementation specification.

| AREA | REVISION |
| --- | --- |
| **Homepage structure** | Consolidated 14 draft sections into seven public-facing content sections plus footer. |
| **Hero conversion** | Reduced three hero actions to one primary and one secondary action. Chauffeur registration moves to the product section. |
| **Brand narrative** | Merged repeated language about movement, connection, Sri Lankan origins and future expansion. |
| **GoChauffeur** | Kept as the first flagship product while preserving Go Technologies as the dominant parent brand. |
| **Claims** | Avoided unverified claims about network size, guaranteed reliability, verification or nationwide readiness. |
| **Legal readiness** | Added corporate privacy, website terms and cookie requirements, plus separate GoChauffeur legal-document scope. |

Publishing principle
Only text labelled PUBLIC WEBSITE COPY should appear on the site. Notes, route labels, legal checks and claim checks are implementation guidance.

# The corporate gateway into the Go ecosystem.

The Go Technologies website should explain the company, introduce GoChauffeur as its first product, build confidence in the broader vision, and route each visitor towards the appropriate destination. It should not function as the GoChauffeur booking platform itself.

## Primary visitor routes

| VISITOR | PRIMARY DESTINATION |
|---|---|
| **Traveller** | Explore GoChauffeur |
| **Chauffeur** | Register with GoChauffeur |
| **Partner or business** | Partner with Go |
| **General visitor** | Discover Go Technologies |

## Recommended navigation

- Home
- About
- GoChauffeur
- Partnerships
- Contact

Navigation guidance
Use 'About' rather than 'About Go' for immediate clarity. GoChauffeur may be visually emphasised, but the header must retain Go Technologies as the primary identity.

02 / HOMEPAGE - HERO

PUBLIC WEBSITE COPY

# Everything begins with Go.

## Technology for journeys that matter.

Go Technologies builds digital products that make travel and mobility simpler, more connected and easier to navigate - starting with GoChauffeur.

EXPLORE GOCHAUFFEUR →

DISCOVER GO TECHNOLOGIES →

### Built in Sri Lanka. Designed for the world.

Implementation note
Use one H1 only: 'Everything begins with Go.' Do not place 'Register as a Chauffeur' in the hero. That action appears within the GoChauffeur section and final audience router.

03 / HOMEPAGE - WHAT WE BUILD

PUBLIC WEBSITE COPY

# More than a product. A technology company built around movement.

Go Technologies builds digital products around the way people move, travel and experience the world.

We combine technology, thoughtful product design and an understanding of real-world conditions to make fragmented experiences easier to coordinate.

We begin with travel and mobility through GoChauffeur, while building Go Technologies with room to grow beyond a single platform.

## Built to Move. Made to Connect.

Optional route
If a dedicated About page exists, add the text link 'Our vision →'. Otherwise omit it rather than linking to an unfinished page.

04 / HOMEPAGE - FLAGSHIP PRODUCT

PUBLIC WEBSITE COPY

# Meet GoChauffeur.

GoChauffeur is a travel and mobility platform designed to make private chauffeur-led travel across Sri Lanka easier to discover, arrange and coordinate.

| FOR TRAVELLERS | FOR CHAUFFEURS |
| --- | --- |
| **Your journey, thoughtfully handled.** | **Drive with GoChauffeur.** |
| From airport transfers and point-to-point travel to day journeys and multi-day trips, GoChauffeur helps travellers plan private journeys with greater clarity. | Join a mobility platform designed to connect professional chauffeurs with travellers seeking private journeys across Sri Lanka. |
| **EXPLORE GOCHAUFFEUR →** | **REGISTER AS A CHAUFFEUR →** |

## What travellers can plan

- Airport transfers
- Point-to-point travel
- Chauffeur service for a day
- Multi-day chauffeur journeys
- Help planning a flexible trip

Claim check before publication
Do not add claims such as 'verified', 'fully vetted', 'guaranteed', 'nationwide network' or '24/7 support' until the relevant operational process exists and can be evidenced.

05 / HOMEPAGE - HOW WE BUILD

PUBLIC WEBSITE COPY

# Technology that feels human.

## The best technology does not demand attention. It removes friction.

| | | |
|---|---|---|
| 01 | **Designed around people** | We start with real needs and real conditions, not features for their own sake. |
| 02 | **Built to connect** | We bring people, services and technology into one clearer experience. |
| 03 | **Made for movement** | Our products are designed around journeys, coordination and the world beyond the screen. |
| 04 | **Ready for what is next** | We build with the ability to grow across products, categories and borders. |

06 / HOMEPAGE - VISION

PUBLIC WEBSITE COPY

# Starting with mobility. Building what comes next.

## GoChauffeur is our first product, not the limit of our ambition.

Go Technologies is building towards a connected ecosystem where technology can simplify more of the travel and real-world experience - from movement and discovery to the services that support a journey.

We begin in Sri Lanka, a market with distinctive travel patterns, infrastructure and opportunities. Building here gives us direct exposure to practical problems worth solving.

Our ambition is to turn that understanding into products with the potential to travel beyond borders.

## Sri Lankan beginnings. Global possibilities.

Future-product guidance
Do not display empty product tiles or name unapproved future products. The website may communicate direction and possibility without representing ideas as committed launches.

07 / HOMEPAGE - PARTNERSHIPS AND CONVERSION

PUBLIC WEBSITE COPY

# Better journeys are built together.

Go Technologies works with organisations and individuals that can strengthen the products and experiences within the Go ecosystem.

- Technology partners - Build and integrate useful capabilities.
- Travel and hospitality businesses - Connect relevant services and traveller experiences.
- Mobility partners - Help improve how people move through GoChauffeur.
- Strategic partners - Explore what Go can build next.

**PARTNER WITH GO →**

---

# Where do you want to Go next?

| | | |
|---|---|---|
| **I'M TRAVELLING** | Discover private chauffeur-led journeys with GoChauffeur. | **EXPLORE →** |
| **I'M A CHAUFFEUR** | Explore opportunities to join the GoChauffeur platform. | **REGISTER →** |
| **I WANT TO WORK WITH GO** | Explore partnership opportunities with Go Technologies. | **PARTNER →** |

PUBLIC WEBSITE COPY

# Everything begins with Go.

One idea can become a product.
One product can become an ecosystem.
And one journey can lead somewhere completely new.

We are starting in Sri Lanka. We are building for what comes next.

## Where does Go go next?

**START A CONVERSATION →**

## Footer structure

| BRAND | PRODUCT | COMPANY | LEGAL |
|---|---|---|---|
| Go Technologies<br><br>Everything begins with Go. | GoChauffeur<br>Explore GoChauffeur<br>Register as a Chauffeur | About<br>Partnerships<br>Contact | Privacy Notice<br>Website Terms<br>Cookie Policy |

### Temporary copyright wording

© 2026 Go Technologies. All rights reserved.

Legal-entity check
Until incorporation is complete, do not publish 'Go Technologies (Private) Limited' as the website operator or contracting entity. Replace the temporary wording only after confirming the exact registered legal name, registration number and address.

## Recommended SEO metadata

Meta title: Go Technologies | Technology for Journeys That Matter

Meta description: Go Technologies builds digital products that make travel and mobility simpler, more connected and easier to navigate - starting with GoChauffeur in Sri Lanka.

09 / REQUIRED CORPORATE LEGAL PAGES

# Separate legal routes - linked from the footer.

The following pages are implementation requirements and should not be inserted into the homepage body. Tourithm may design and implement the routes, but final legal language should be reviewed by qualified Sri Lankan counsel.

| ROUTE | PURPOSE AND REQUIRED COVERAGE |
|---|---|
| **/privacy** | Identify the actual data controller; data collected; purposes and lawful bases; service providers; overseas transfers; retention; user rights; security; privacy contact; effective date and updates. |
| **/website-terms** | Website access and acceptable use; intellectual property; accuracy and availability; third-party links; prohibited activity; disclaimers; liability limits; governing law; changes and contact details. |
| **/cookies** | Essential, analytics and marketing cookies; provider, purpose and duration; consent controls; withdrawal and browser settings. |

## Contact-form privacy copy

### By submitting this form, you acknowledge that your information will be processed in accordance with our Privacy Notice.

Optional, separate and unchecked marketing consent:

### I would like to receive news and product updates from Go Technologies.

Analytics and advertising
If GA4, Meta Pixel or other non-essential tracking is enabled, implement a consent manager that can block those tools until the required choice is made. Provide Accept, Reject and Manage preferences controls with comparable prominence.

# Product terms must remain separate from corporate website terms.

Before GoChauffeur accepts commercial bookings, payments or chauffeur registrations, its legal framework should reflect the final operating model. A generic corporate website policy is not sufficient.

## Required product documents

- Traveller Booking Terms
- Chauffeur or Service Provider Agreement
- Cancellation, Refund and No-show Policy
- GoChauffeur Privacy Notice
- Cookie Policy and consent controls
- Acceptable Use and Conduct Rules
- Partner Agreement where travel or hospitality businesses participate

## Issues those documents must resolve

- Whether Go Technologies is the principal service seller or a marketplace/intermediary
- How a booking is formed and accepted
- Pricing, commissions, currencies, taxes and invoicing
- Payment authorisation holds, capture, cancellation and partial refunds
- Delays, service changes, no-shows and force majeure
- Chauffeur, vehicle, licence and insurance responsibilities
- Traveller and chauffeur conduct, complaints and incident handling
- Liability allocation and dispute resolution
- Sharing of identity, contact, itinerary, location and payment-related data

Critical commercial decision
The principal-seller versus marketplace model must be confirmed before finalising booking terms. It affects liability, invoicing, VAT treatment, payment flows and the description of GoChauffeur's role.

# Confirm before the website goes live.

☐ 01 Exact legal operator name, registration status, registration number and address

☐ 02 Final URLs for GoChauffeur, chauffeur registration, About, Partnerships and Contact

☐ 03 Whether GoChauffeur is publicly live, in pilot, accepting interest or accepting paid bookings

☐ 04 Any claims about chauffeur verification, service coverage, response times, support and insurance

☐ 05 Privacy contact email and operational process for handling data requests

☐ 06 Final list of processors and tools: hosting, CMS, forms, analytics, advertising, email and security

☐ 07 Cookie classification and consent behaviour tested before analytics/marketing tags run

☐ 08 Mobile and desktop CTA destinations tested

☐ 09 Single H1, metadata, Open Graph image, favicon, sitemap and canonical URL

☐ 10 Legal review of corporate policies and GoChauffeur commercial terms

Document status
This is an amended content and implementation draft. It is suitable for design and client/vendor alignment, but it is not a substitute for final legal advice or approval of operational claims.
